DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a dry toner, classified in class 430, subclass 110.1.
- II. Claims 3 and 4, drawn to a process of producing a dry toner, classified in class 430, subclass 137.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as dispersing wax particles and polymerizable monomer in a liquid medium having a surfactant so that the monomer is attracted to the surface of the wax particles, polymerizing the polymerizable monomer so that the wax particles are enclosed within the formed toner particles, adding a releasing agent material to the liquid medium so that the releasing agent material adheres to the surface of the formed toner particles, removing the formed toner particles from the liquid medium, and applying a surface resin coat layer to the toner particles by a spray drying technique.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1756

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is also advised that this application is no longer subject to unity of invention restriction principles as set forth in 37 CFR 1.475 and 1.499 because it is not a national stage application. Restriction under 35 USC 121 is proper. See MPEP 1895.01(D).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
